Good morning Warrensburg, and the surrounding area! This is the Warrensburg Area Amateur Radio Club, Incorporated, **USB Net!** USB stands for **Upright and Still Breathing,** and the purpose of this net, each Monday, Wednesday and Friday morning at 8:00am is to test morning propagation and our equipment, to wake the world up with a smile, and to let everyone know that YOU have made it to another day.   Please let us invite you to jump on in and say hi, and report on what is going on in your world!

Let's first take a standby for any formal, priority or medical traffic... This is _____, Good Morning!

Hearing none, let's get started...

Weather report: Todays high will be _____, and the low of _____

Solar Conditions: The solar flux is __, the geomagnetic field is _____.

Club calendar news: _____

Birthdays/Anniversaries/other: _____

I am monitoring my text service, email and Facebook, and I have another radio monitoring our 440 repeater...

Let's see who is up and at 'em this morning! This is **(Net Callsign)** taking check-ins.

*** Net control Notes:
- Continue taking check-ins until the pace of the net slows down the first time. Try to say good morning, give a signal report, comment on whatever the check in talks about and be sure to wish each person a great day and a thank you for supporting the net.
- To take up dead air time, do the mini commercial: We run this net Monday's, Wednesdays and Fridays, just to wake the world up one ham at a time!
- Identify often: This is (Net Callsign), this is the USB Net and this is YOUR chance to check in!

_____
At a slow point in the net, to draw in more check-ins, read the USB Net commercial:

This net was created due to a request for a regular morning check-in net, so that if something might happen to one of our regular participants, friends and family could be alerted that something may be wrong. This net is a friendly, ham radio way to keep in touch each other and to say "good morning!" as we sip our morning coffee together, and maybe we can generate a conversation or two after the net.

_____

Thank you for participating in today's USB net. Everyone get out there and have a happy and productive day, and we will see you on our next net at 8:00am on _____. *(Mention Sunday Night Net on Fridays)*
We had _____ check-ins and the net lasted for _____ minutes.
Remember (club news this week) _____
73 everyone, be sure to send in your club dues!
We will now return this repeater to routine amateur use. This is **(Net Callsign)** signing clear, and monitoring.
